

"Addressing Garbage Dumping in Empty Plots"

(Collective Inputs from 335,000 strong Swachh Bharat Circle)

- 1. Dumping waste in open plots should attract fines
- 2. A website should be started for every municipal zone where people can upload pictures of other people and vehicles throwing garbage in empty plots with their details
- 3. People should be encouraged to click pictures and upload them
- 4. The municipality should run campaigns to create awareness about throwing waste in open plots
- 5. Penalties should be established and enforced by municipalities for dumping garbage in empty plots
- 6. These fines should be in the range of two to five thousand rupees
- 7. Guidelines should be established by municipalities for plot owners such that garbage dumping is discouraged on such plots
- 8. Garbage bins should be provided in every vicinity so that people do not need to throw garbage anywhere else
- 9. Every society/colony should have a large dustbin where garbage from smaller bins could be dropped
- 10. Garbage management could be handed over to private operators to ensure better execution
- 11. Door-to-door collection of waste should be organised so that people don't need to throw garbage in empty plots
- 12. Areas where garbage is usually dumped should be identified and beautified
- 13. Private players could start a waste management/recycling business and people could actually get paid for dropping their daily waste to their sites
- 14. Fencing of empty plots should be enforced by municipal corporations
- 15. RWAs should be involved to keep a vigil in their area as well as educate their residents about not dumping garbage in open plots
- 16. Warning boards could be placed outside empty plots stating that throwing garbage will attract fines with specific details.
